

LAOS Laser - Feature #15

Stand-alone CUPS-laos server on openWRT or RaspberryPi

2012-07-19 23:59 - peter

Status:	Closed	Start date:	2012-07-19
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Printserver	Estimated time:	0.00 hour
Target version:			
Description			
A stand-alone WiFi router (OpenWRT) or embedded linux board (e.g. Raspbery PI) could act as a true LAOS Postscript network printer, A standard distribution (OS+Driver) could be made to allow plug-and-play operation.
