

## LAOS Laser - Feature #65

### Show the outline of the drawing

2012-12-29 17:24 - peter

<b>Status:</b> Closed	<b>Start date:</b> 2012-12-29

<b>Target version:</b>	
<b>Description</b> The outline of the drawing is stored in the file (when using CUPS). The laser should have a "preview mode" where it scans the outline to check the positioning of the drawing on the substrate.

Just a suggestion: Use VisiCut with a Camera and you'll get your preview. However, it should no be too hard to implement such a preview feature. As soon as I get my display up and running, I may start implementing.

I agree, use a camera: <https://github.com/t-oster/VisiCut/wiki/Adding-a-webcam>
